Milestones

Group Stronghold

Qingyuan Pontex-

◆Equipment ◆ Composite production base
 Address : Qingyuan City, Guangdong Province Qingxin District Taiping Town Longwan Industrial Park
 Covers an area of about 86,60 square meters (130acres)

Taiwan Pontex (World Headquarter) -

◆Composite production base/
 ◆R&D center
 Address : Longxing Ln.,Sec.2, Fengxing Rd., Tanzi Dist., Taichung City
 Covers an area of about 34,700 square meters

VietNam Pontex-

◆Equipment ◆Composite production base
 Address : My Phuoc II Industrial Part, Binh Duong Province
 Covers an area of about 50,000 square meters

Major business divisions-1

Plastic Compound Material
 Revenue ratio: **70%~80%**

- ◆ Engineering modified plastic & Other High Specification Materials
- ◆ Recycled materials(PCR)
- ◆ Biodegradable materials
- ◆ Electroplatable High-Density Plastic
- ◆ Solar panel material & Profile extrusion
- ◆ Textile Board

Major business divisions-2

photos of finished shoes are quoted from CROCS official website

Equipment Injection
Revenue ratio: **20%~30%**

- ◆ Casual shoes and accessories
- ◆ Sneakers outsole (Soccer shoes, Baseball shoes, Football boots, Golf shoes)
- ◆ Sneaker parts injection
- ◆ Other injection (non-shoes)

NEW-Thermocompression Composite Factory Introduction

精進創新

永續邦泰

ISO 14001 · ISO 9001 · IATF16949

■ Thermocompression Composite Factory

Based on the promotion of environmental protection recycling and the development of industrial zero waste solutions, the company has built a new production line in the parent company in Taichung, which can help solve the huge scraps and waste textiles generated by major apparel brands and fabric factories every year, create new circular economy value, and expand the company's new industrial business opportunities. The process technology of Bangtai hot pressing plant is made from recycled cloth or textile fiber crushed material, and through the automatic hot pressing process (the patent of the cross-strait process has been applied), a large flat plate is produced, which becomes the material for indoor building materials and home decorations.

According to the needs of the product, the client will cut it into including wall decoration, home shelves, shopping mall layout, exhibit base, picture frame, frame, signboard, interior art... and other diversified product uses.

The crushed fabric itself has a variety of colors, through the color selection, the product can present a rich pattern color and fashion sense, in the foreign fashion industry, has been seen to be used to display the base of high-end brand-name goods.

■ Fully automatic production process

Capacity: 12,000 pieces/year/1 production line
Size: 240cm x 120 cm

ISO 14001 · ISO 9001 · IATF16949

Plastic Compound Material

- Development of low-carbon/carbon-reducing composite materials:
 1. Replastic-recycling-reuse(circular economy materials)
 - PCR post-consumer recycled plastic materials
 - Industrial zero waste solutions
 2. Plastic reduction-biomass alternative materials (green materials)
 - Biodegradable materials
 - Customized plant fiber alternative formulations

- Promotion of index products (semi-finished products):
 1. Composite solar frame
 2. Textile board

Equipment Injection

- Expanded the mold factory to improve the autonomy of development .
- Expand the existing cooperative shoe factories and multi-brand OEM.
(international brands and Chinese brands)
- Increase cooperation with new shoe factories and introduce new brand OEM.
- Diversified development of non-footwear product OEM .
